OBJECTIVE

• I am a dedicated computer science student specializing in Artificial Intelligence and Machine Learning. With strong technical skills in programming languages like Java and Python , along with expertise in web development tools like HTML, CSS . I am passionate about leveraging technology to create user-friendly solutions .

EDUCATION

- **B.Tech in Computer Science and Engineering (AI-ML)** **(2022 - 2026)**
  Keshav Memorial Institute of Technology, Hyderabad. CGPA: 7.45%
- **Intermediate** **(2020 - 2022)**
  Telangana Residential Educational Institutions Society (TSRJC Boys) . CGPA: 94.1%
- **School** **(2016 - 2020)**
  Krishnaveni Talent School. CGPA: 10/10

SKILLS

- **Programming :** Java, Python, JavaScript
- **Web Technologies :** HTML, CSS, JavaScript , React.js, Node.js, Express.js, RESTful APIs
- **Tools :** Git, GitHub, VS Code
- **Databases :** SQL , MangoDB

PROJECTS

- **PhishGuard – Scam Email & URL Detection System**
  ◦ Developed an intelligent phishing detection system combining URL analysis, domain validation, and AI-driven content evaluation to identify potential scam emails and malicious links
  ◦ Designed an automated analysis pipeline to extract phishing indicators and generate structured JSON-based threat reports without manual intervention.
  ◦ Built a modular backend in Python with scalable architecture, enabling real-time threat detection and easy integration with security monitoring systems
- **Neon Digital Twin– AI-Powered Personalized Assistant**
  ◦ Developed an AI-powered digital twin platform with real-time voice chat using the Web Speech API, enabling natural speech-to-text and text-to-speech interaction without manual file uploads.
  ◦ Implemented an LLM-based personality profiling system that automatically extracts user traits, goals, stress triggers, and communication style from conversations to dynamically build and update the digital twin profile.
  ◦ Integrated RAG (Retrieval-Augmented Generation) with MongoDB Atlas Vector Search to provide the twin with long-term memory, semantically retrieving stored user insights such as preferences and emotional patterns to generate personalized, context-aware responses.
